Container Gardening – September 22
Join us to learn the practice of growing plants exclusively in containers. Container gardening offers an alternative option to planting in the ground. Container gardening allows you to grow on a balcony, patio, indoors on windowsills, or in rooms with adequate light. Growing plants in containers makes gardening accessible to almost anyone including children, those with limited mobility, and the elderly. Plants in pots can easily be moved to suit your needs or to a more suitable sunny or shady location during the day.
