Automotive Maintenance & Light Repair

Job Responsibilities:

- Auto mechanics/repair workers inspect, operate, and test machinery and equipment to diagnose malfunctions.

- They repair machines, equipment, and structures, using tools such as hammers, hoists, saws, drills, and wrenches.

- They order parts, supplies, and equipment from suppliers. Mechanics also clean shafts, bearings, gears, and other parts of machinery.

This is the program for YOU!

In the Automotive Maintenance & Light Repair Program at Shawnee Community College, students will be prepared for employment in areas of the automotive field such as dealerships, independent garages, service stations, and speciality shops which cover tune-ups and brakes. Students will learn basic shop operations, diagnoses, basic repair, interpretation of manuals and skillful use of tools.
