Basic Electricity

Job Responsibilities:

- Electricians install, maintain, and repair wiring, equipment, and fixtures. They ensure that work is in accordance with relevant codes. Electricians may install or service street lights, intercom systems, and electrical control systems.

- Electricians prepare sketches and follow blueprints to determine the location of wiring and equipment and to ensure conformance to building and safety codes.

- They test and inspect electrical systems, equipment and components to identify hazards, defects, and the need for repairs.

This is the program for YOU!

In the Basic Electricity Program at Shawnee Community College, students will be provided with the basic knowledge to install, operate, and maintain basic residential wiring.
