Certified Nursing Assistant

Job Responsibilities:

- Certified Nurse Assistants (CNA’s) provide basic patient care under the direction of nursing staff.

- They take care of patient needs, such as feeding, bathing, dressing, grooming, and moving patients and changing linens.

- CNA’s observe patients to detect symptoms that may require medical attention, such as bruises or open wounds.

- They also answer patient calls, signal lights, bells, or intercom systems to fill patients’ needs.

This is the program for YOU!

In the Certified Nursing Assistant program at Shawnee Community College, students will be taught and trained as an integral part of a health care team, under the direction of a registered nurse, in nursing homes, and home health care settings.
