

## SHAWNEE COMMUNITY COLLEGE ADN 201 NURSING SKILLS REVIEW

### Criteria for Pre-Entrance Clinical Skills Examination

**Purpose:** To provide an understanding of the potential student's clinical performance abilities based on the standards as listed on the Skills Performance Evaluation. The Clinical Skills Examination is a part of the pre-entrance testing to the program and is done to determine the person's basic nursing skills abilities.

The individual will, via a return demonstration in a laboratory situation, perform a catheterization procedure, administer an injection, and complete a paper-pencil medication and drug calculation examination (see course syllabus for the Clinical Skills Guide and Skills Performance Evaluation form). Your acceptance letter instructed you to call 618-634-3327 to make an appointment to take your clinical skills examination. You must complete this process by July 15, 2010. Please call Mary Luke to set up a time for these appointments. This course is the final stage in the acceptance process and must be "Passed" in order for your admission process to be complete. You have two opportunities to successfully complete the clinical skills testing. You are strongly encouraged to utilize lab time prior to your appointment to practice and review procedures and math if necessary.

If you have any questions about this process please call Mary Luke at 618-634-3327.
